

# **Bikinlagi Website User Manual**

## **1. Introduction**

Bikinlagi is a website that acts like a third-party intermediary between an Artist and the client that wants to commission their art. It gives the client a catalogue of various artist that already has connection to the website to choose from, with their own respective art style. The website also calculates how much the client must pay to commission their art.

## **2. Homepage**

This is where the user first land on the website. Upon landing there will be a loading bar that shows before all the content on the website loads up. On the homepage there will be a lot of content such as the navbar, showcase, category, featured artist, and featured reviews.

### **2.1.Navbar**

The Navbar on top of the website shows a few button that the user can click, such as the login and register button that will redirect them to their own respective page. The cart button to see all the product and add them to the cart. And the home button that will take them to the homepage. Currently the search and category button isn't a part of our website yet.

### **2.2.Showcase**

Below the navbar there's a showcase that looks like a slideshow. It usually shows the most featured product or just a bunch of sale or promotion that the web currently has.

### **2.3.Category**

Below the showcase there's a featured category, it shows the most or recommended category there is on the website.

### **2.4.Featured Creator**

Just below the featured category section, there's a featured artist or creator section. It shows the most featured or the most popular artist this month. Clicking on the artist name will take the user to the artist profile page.

### **2.5.Review**

Below the artist section, there's a set of reviews that featured on the website. It shows how the client thoughts and satisfaction for the website.

### **2.6.Footer**

Just at the bottom of the page there's a footer that shows a the social media of the website.

### **3. Register**

If the user click the register button on the navbar, it will take them to the register page, where they can register their account by filling the provided form. And after the register completed the user can click the login button to go to the login page.

### **4. Login**

User can login their registered account by filling the form with their account information. If they didn't have an account they can click the register here button to redirect them to the register page. After user successfully logged in, the website will automatically redirect them to the homepage.

### **5. Artist Page**

Here shows the selected artist short biodata also their social media, this allows the user to check the integrity or the art style from the artist by following their social media.

### **6. Cart Page**

Here the user can see all the available product and add them to the cart. Since this website is only an intermediate between the client and the artist, the shopping cart function as the estimation of how much user will have to pay before contacting the artist. They can see the total sum of how much the commission of the art they ordered when they add an item to the cart. When an item added to the cart, there will be a contact artist button that will redirect you to a final form to the commission, and a clear all button to remove the cart content.

### **7. The Contact Form**

Here the user will fill a form before contacting the artist which consist of name, style they want to choose and so on. When they press the send button, it will take the user to the application Whatsapp and contact the artist. Here after they send the form from the website, they can discuss how the art should be made, how long does it take, and even negotiate the price that was before set up by the website.
